

Sia Xiong

SOFTWARE DEVELOPER

Profile

During my internship for the City of Sacramento's IT Department, I provided excellent help desk support to people. When I left they collectively gifted me a Amazon gift card. It is not the monetary value but the appreciation I received that continues to drive me to learn, create, and solve the technological challenges that we face in society today.

Employment

Web Intern, City of Sacramento

JUNE 2020 – AUGUST 2021

- Created a voice to text speech recognition prototype
- Redesigned a pop up modal for the pet shelter department
- Updated a tax calculator for the parking department
- Used SiteCore (a content management system) to create and update the City of Sacramento's website
- Used Adobe Experience Manager (another content management system) to build pages for the new City website
- Used SeamlessDoc to create dynamic documents for other departments in the City

Education

Computer Science, California State University, Sacramento

MAY 2022
